21D011 - Networks: Models and Applications	Content was good, and work was adequate. Enjoyable.	4
	Good course, also the workload was well adjusted in comparison with past term.	5
	Great course overall, I felt like I learned a lot. Much better with the presentation rather than the exam as it allowed for valuable feedback (and it was cool seeing what everyone else was working on).	5
	Just make sure that the datasets of the problem sets have all the information needed. Also that the difficulty of the questions doesn't come from cleaning the data.	5

Manuel Lleonart	I already wrote the TA feedback, but it's worth restating that Manuel was great.	5
	Thank you for all the effort in solving some of the questions of the problem sets that couldn't be solved given the information, and also for sharing the code to clean some of the datasets.	5
